In July 1953 a radar installation was on a small rise of ground about one 11 north of Tat'ang (1129/1048) Village¹ on Honan Island across the river from Canton. The antenna, which was rotating slowly, was rectangular in shape and was mounted on a small house.² Adjacent to the antenna was a low building about 10 feet high and 20 feet square from which the humming sound of a motor could be heard. The door of this building was covered with canvas and was guarded by a soldier.

25X1A

Comments

1. Tat'ang Village is located at N 23-05.4, E 113-19.1 on Admiralty Chart 1742.
2. From a group of sketches of radar equipment, the informant chose SCR-270-DA as the one most nearly resembling that which he saw.
